## Face Perception

### Aaron Johnson, Ph.D.

Department of Psychology, Concordia University  
CRIR — MAB-Mackay Rehabilitation Centre  
CIUSSS du Centre-Ouest-de-l'Île-de-Montréal  
Montréal QC

Aaron Johnson is Associate professor in the Department of Psychology of Concordia University, and a research resident at CRIR — MAB-Mackay Rehabilitation Centre of the CIUSSS du Centre-Ouest-de-l'Île-de-Montréal. His research focuses on both basic visual perception, as well as vision in tasks of daily living in individuals with low vision.

A common complain amongst those with low vision is difficulty in recognizing faces and emotions. Despite this, when compared to other areas of research (such as reading), there is relatively little research that has explored face perception within individuals with low vision. In this conference, I will describe the previous research in this area. I will also describe research conducted at the MAB to investigate emotion detection and classification, and see if techniques commonly used in rehabilitation can be used to improve performance in these tasks.

**Le vendredi 19 janvier 2018**  
12h00 à 13h00

**CIUSSS du Centre-Ouest-  
de-l'Île-de-Montréal**

**Centre de réadaptation MAB-Mackay**  
Salle E-025  
7010, rue Sherbrooke Ouest  
Montréal QC
